Master course in Marine Biology

<https://biologia.biologia.unipd.it>

WELCOME to Padua University!
WELCOME to Chioggia!
WELCOME to the Master course in Marine Biology!

Objective:

To train students with modern approaches to become experts in:

- Lab and field studies on marine biodiversity
- Development of conservation strategies
- Sustainable management of marine resources
- Development of a sustainable aquaculture

2 main areas:

1. Biodiversity and management of marine organisms
2. Aquaculture and health of farmed organisms

Course organization

51 ECTS: 7 courses (49 ECTS) + 1 practical marine ecology activity (2 ECTS)

- To introduce the students to the different aspects of marine biodiversity and its importance for humankind
 - To provide teoretical and practical instruments for the study of biodiversity

BIODIVERSITY AND MANAGEMENT OF MARINE ORGANISMS

- 20 ECTS of specialist courses
- 8 ECTS of courses of your choice

AQUACULTURE AND HEALTH OF FARMED ORGANISMS

- 20 ECTS of specialist courses
- 8 ECTS of courses of your choice

41 ECTS for the thesis project

Activities of the courses:

- Seminars of experts
- Surveys to lagoon and coastal areas
- Surveys at fish markets and aquaculture facilities
- Field practical activities
- Laboratory practices in zoology, botany, ecology, physiology, genetics, microbiology, ...
- Practices in computer laboratory using different softwares

Extracurricular activities

- Marine biology meetings
- Meetings, conferences and workshops
- Activities of the Museum of Adriatic Zoology

Historical ecology of semi-enclosed basins:
past, present and future of seas at risk
3-4 October 2015, Villa Magna Feltrin Group - University of Padua,
Chioggia - Italy
Book of abstracts

CHIOGGIA
16-17
maggio
2019
IL WORKSHOP SUGLI
ELASMOBRANCHI DELLE ACQUE ITALIANE
TASSONOMIA, IDENTIFICAZIONE E
NORMATIVE

Gli incontri di Biologia Marina
Evoluzione, Ecologia e Conservazione

9-month degree internship for the thesis:

- Research in the laboratory
- Field research

- At the University of Padua
(Hydrobiological Station)
- In other Italian universities or research centres
- Abroad (Erasmus and more)

Laboratory health and safety training courses are required in order to guarantee a safe access to the teaching laboratories and make the students aware of the hazards related to specific environments, activities and procedures.

Safety training is organized by the University of Padova and takes place online at <https://elearning.unipd.it/formazione>

- **Formazione generale/General training - Health and safety at the work place low risk (4h)**
- **Formazione specifica/Specific training course in health and safety at the workplace- High-risk activities (12h)**

The passing of the two tests is mandatory to participate to the teaching laboratories and to the thesis internship. A certificate will be released at the end of each passed test. The student should download it.

In order to take the courses and the final tests, please log in with **your SSO Single Sign On credentials** (name.surname@studenti.unipd.it and password of your university account) at:

<https://elearning.unipd.it/formazione/course/index.php?categoryid=40>

Laboratory health and safety training courses are mandatory to participate to the teaching laboratories and to the thesis internship

For students who cannot have SSO, the host structure or teacher must request the creation of an access account to the email address form.sicurezza@unipd.it specifying the reasons for the access request.

Previous security training certifications can be accepted for **General training - Health and safety at the work place low risk**; please send the certificate to form.sicurezza@unipd.it to ask the validation.

No certification can be accepted for **Specific training - High-risk activities (12h)**.
Therefore the student must take the course and the test.

Supports for Inclusion

Student Services Office – Inclusion

The Student Services Office provides support to students with disabilities and Specific Learning Disabilities (SLD) so that they benefit from the right to a university education.

email: inclusione.studenti@unipd.it

Heads of Inclusion and Disability

Each University department has appointed a Head of Inclusion and Disability for issues concerning inclusion, disability, learning difficulties and vulnerability. They collaborate with the Rector's delegate to promote inclusion policies for the benefit of all members of the University community: students, technical and administrative staff, and professors. They set up customized interaction between students and colleagues in order to promote participation in university life and the right to a university education, thus stimulating students to manage their university lives with determination and raising awareness of inclusion policies among department members. Furthermore, they strive to create a welcoming environment and a sense of belonging.
